DETAILED ACTION

Response to Amendment

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 9/14/2005 has been entered.

Allowable Subject Matter

Claims 1, 12, 24, 36, 48, 51, 54, 56, 67, 79, 81 contain allowable subject matter and claims 11, 23, 66, 78, 80, 82 contain allowable subject matter based on their dependence of independent claims 1, 12, 56, 67, 79, 81 respectively.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 55 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sinclair and Goldberg.

Regarding claim 55 Sinclair teaches receiving updated gaming profile data relating to the users (see col. 13, lines 39-43). Sinclair teaches modifying the stored user gaming profile data,

Art Unit: 2683

based of the received updated profile data (see col. 13, lines 35-43). Sinclair teaches maintaining a group of portable communication device users associated with a group (see col. 5, lines 5-13). Sinclair does not specifically teach a method of maintaining a group of portable communications device users associated with an affinity group based on comparisons of stored user gaming profile data, comparing the modified user gaming profile data to a predefined affinity group definition or modifying as needed the users associated with the affinity group based on the comparison of the modified user gaming profile data with the predefined affinity group definition. Goldberg teaches maintaining a group of users associated with an affinity group based on comparisons of stored user gaming profile data (see col. 5, lines 42-45). Goldberg teaches comparing the modified user gaming profile data to a predefined affinity group definition and modifying as needed the users associated with the affinity group based on the comparison of the modified user gaming profile data with the predefined affinity group definition (see col. 5, lines 42-55 and col. 12, lines 1-8). It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the gaming profile data relating to the users in Sinclair adapt to include a method of maintaining a group of portable communications device users associated with an affinity group based on comparisons of stored user gaming profile data, comparing the modified user gaming profile data to a predefined affinity group definition or modifying as needed the users associated with the affinity group based on the comparison of the modified user gaming profile data with the predefined affinity group definition because creating an affinity group of portable communication device users would allow for improved customization of an interactive game based on mobile station activity.

Claim Rejections - 35 USC § 112

Art Unit: 2683

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 recites the limitation "the profile data" in line 1. There is insufficient antecedent basis for this limitation in the claim. Claims 3-5, 7-10, 13-16, 18-22, 25-28, 30-35, 37-40, 42-47, 49-50, 52-53, 55, 57-60, 62-65, 68, 69-71, and 73-77 are rejected based on the same reasoning as recited above.

Claims 6, 17, 29, 41, 61, and 72 are rejected based on their dependence of dependent claims 5, 16, 28, 40, 60, 71 respectively.

Response to Arguments

Applicant's arguments filed 8/15/2005 have been fully considered but they are not persuasive. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., "wherein the gaming profile data includes billing information, affinity group membership, portable communications device model, game applications resident on the user's portable communications device, user skill level, portable communications device usage level, any wireless connectivity, and inclusion and exclusion of other users") are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
